

Powergate V3.86 – Personal OBD programmer

Powergate is the most versatile device ever created for serial programming via diagnostic plug. By using all the newer protocols of communication (K-LINE, CAN and J1850), **Powergate** can read and write the Electronic Control Unit of many vehicles on the market.

Powergate has an internal memory which can contain, in addition to the original file, two different maps. In this way, the owner of the vehicle has always at his disposal two different developing steps of the map, to be uploaded on the ECU at any moment.

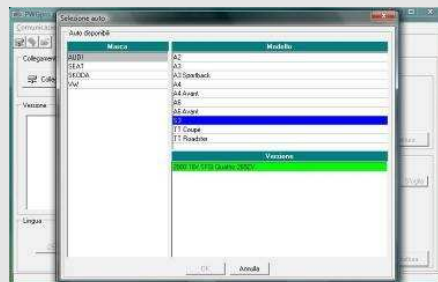

Updating protocols of communication has never been so easy: a connection to the internet and a few minutes are all it is required to access Alientech *Data Bank* for downloading everything is needed to make **Powergate** operative on the largest number of vehicles as possible. This solution was studied for different operating situations, as it is suitable both to professional tuners who want to propose a product always up-to-date, than to users who make use of **Powergate** solely on their own cars. A very versatile device with first-class features.

The display of items on its large screen is very simple. The device itself will guide you through the reading and writing of the ECU, with clear and detailed instructions. Another interesting innovation of **Powergate** is the option to quickly and easily check and erase DTC Errors.

PWGpro is the software to manage **Powergate**, a simple interface that guides user from choosing

the vehicle, to saving and uploading several mapping files, ready to be written directly on the vehicle.

Versions

To better meet our customers' needs, Powergate is proposed in the following versions, each addressed to a different target:

Powergate M - available from version M01 to M12, is addressed to professional tuner only for programming vehicles of a certain brand.

Customizations

Alientech gives his dealers the opportunity to customize **Powergate** with their company logo or a personal brand. You can customize your faceplate, using any pattern and color. You can even customize the software interface and the logo that is shown on the display when you turn on the device, thus your customized **Powergate** becomes the winning solution for promoting your own brand.

Minimal Requirements

Powergate II is compatible only with Windows Vista and Windows7

Support list:
